EXPERIENCE

Life Health and Wellness, Greenville, SC — Digital *Records Management Specialist & Front Desk Associate*

JUNE 2022 - JULY 2025 (Summer)

- Optimized space and workflow efficiency by minimizing physical documentation, increasing patient intake capacity and improving operational sustainability for the foreseeable future
- Maintained data integrity and regulatory compliance (HIPAA) through precise documentation practices in a high-throughput healthcare environment
- Improved daily process flow by coordinating room assignments and managing secure records, reducing physician administrative workload and enabling greater focus on patient care

Chimkin Squad, Columbia, SC — Lead Rhythm Game Programmer

SEPTEMBER 2025 - PRESENT

- Develop, test, and refactor Python-based game systems with an emphasis on performance, maintainability, and clean code
- Collaborate with a multidisciplinary team to translate creative concepts into functional software features
- Contribute to system design discussions, feature planning, and iterative improvements
- Apply debugging, version control, and problem-solving skills throughout the development lifecycle

EDUCATION

University of South Carolina, Columbia — *Bachelor of Science in Computer Information Systems*

AUGUST 2024 - Expected Graduation: SPRING 2027

- Software Engineering
- Algorithmic Design I & II
- UNIX/Linux Fundamentals
- Principles of Management

PROJECTS

Virtual Escape Room Application — Project Manager & Developer — Project Grade: 90 (A-)

JUNE 2025 - DECEMBER 2025

- Led cross-functional team of 5 students in Java-based escape room application development, managing project timeline and deliverables
- Facilitated conflict resolution and coordinated team communication, ensuring on-time deliverables despite diverse working styles and technical challenges
- Applied software engineering principles including object-oriented programming, version control, and agile development methodologies
- Utilized Git for collaborative development and Visual Studio for code development and debugging

TECHNICAL SKILLS

Programming Languages:
- Java (Most Proficient)
- Python
- C, C++
- HTML, CSS

Operating Systems:
- UNIX/Linux
- Windows

Development Tools:
- Git / GitHub
- Eclipse IDE
- Visual Studio

Software:
- Microsoft Word
- Microsoft Excel
- Visual Basic

Professional Skills:
- Team collaboration
- Time management
- Conflict resolution
- Process improvement

PROGRAMS PROFICIENT IN

Visual Basic

Eclipse IDE

Microsoft Word

Microsoft Excel

LANGUAGES

American English (Native)

Spanish (Limited)

INTERESTS

Cybersecurity (In attendance during USC Club Meetings)

Machine Learning

Game Development
